Make Your Own Sparkling Hair Combs

- Choose the color of rhinestones you want to use. You'll need a total of 38 size 30ss rhinestones per comb.
- Start gluing the rhinestones at the bottom edge of the comb. We recommend either Devon 2-part epoxy or E6000.
- You can use all of the same color rhinestones or do a diagonal pattern with 2–3 colors. See the picture for different layouts or be creative and make up your own!
- After bottom edge is finished, glue the second row of rhinestones in between the top of the bottom edge rhinestones.
- Repeat process for top row.
- Glue dry time varies—check the bottle or packaging of the glue you use.
