

Make Your Own Earrings

- Earring parts are available in both pierced and clip styles.
- Choose a rhinestone larger than the earring backing you have chosen.
- Glue the rhinestone to the post or clip back – we recommend either Devcon 2-part epoxy or E6000. Some people say Gem-Tac also works.
- Glue drying time varies – see the bottle or packaging for the glue you choose.

- Pierced posts in 10mm.
- Clip earring backs come in 7mm or 15mm.
